Skills

- PHP
- Node.js
- React
- Vue
- Svelte
- Python

EMPLOYMENT HISTORY

Full Stack Developer at Gobi Stories AS

December 2022 — April 2024

As a Full Stack Developer at Gobi Stories AS, I specialized in building dynamic web applications using **Vue.js** for the frontend and **Node.js** for the backend. I designed responsive user interfaces, developed RESTful APIs, and integrated third-party services to enhance functionality. Collaborating with cross-functional teams, I ensured seamless deployment using Docker, delivering scalable and efficient solutions.

- Successfully delivered end-to-end web applications.
- Optimized application performance, ensuring quick load times and a seamless user experience.
- Implemented secure coding practices to safeguard user data and enhance application reliability.
- Managed the entire development lifecycle, from initial concept to deployment.
- Worked closely with cross-functional teams to align on project goals and deliverables.

Full Stack Developer at BuyLink

April 2024 — Present

Currently, I am working at **BuyLink** as a Full-Stack Developer, where I specialize in building dynamic web applications using **PHP** for backend logic and **jQuery** for interactive frontend features. I design responsive interfaces, optimize **Postgre** databases, and integrate RESTful APIs to deliver seamless user experiences.
